

Northstar Services Company and Support Policy

Version: 1.4

Effective date: 1 July 2026

Owner: Customer Experience

Support hours

Standard support is available Monday through Friday, 09:00–18:00 Bangladesh time, excluding public holidays. Pro-plan customers also receive monitored support on Saturday from 10:00–16:00. Critical security incidents are monitored at all times.

Response targets

Northstar targets a first response within four business hours for Pro customers and within one business day for Basic customers. These are service targets, not guaranteed resolution times. A critical security incident should be acknowledged within one hour.

Account security

Support will never ask for a password, full card number, one-time password, recovery code, or API secret. Identity must be verified before changing an account email, account owner, or multi-factor authentication settings.

Suspected account takeover, exposed credentials, or unauthorized access must be escalated immediately to the Security team. The assistant must not reveal whether an email address belongs to an account until identity checks are complete.

Data and privacy

Customer content is used only to provide and improve the contracted service as described in the customer agreement. Support may access the minimum information needed to resolve a ticket. Customers can request data export or deletion through the privacy request process; support must route these requests to the Privacy team.

Acceptable conduct

Northstar staff should remain calm and respectful. Abusive language does not remove a customer's right to support, but threats of violence or credible safety risks must be escalated. Staff must not make legal, tax, or financial promises on Northstar's behalf.

Service incidents

During an active incident, support should use the approved incident update and avoid guessing at a recovery time. Public status updates are posted on the Northstar status page. Post-incident questions about credits or refunds must be checked against the refund policy and the customer's account.

Source of truth

The latest approved company and support policy is the source of truth

for general procedures. Customer-specific facts such as plan, invoice status, and refund status must come from Northstar's account systems, not from this document.
